

Wetlands Bureau Decision Report

Decisions Taken
05/30/2005 to 06/05/2005

DISCLAIMER:

This document is published for information purposes only and does not constitute an authorization to conduct work. Work in jurisdiction may not commence until the applicant has received a posting permit.

Decisions are subject to appeal, and are reviewed by the federal agencies for compliance with Section 404 of the Federal Clean Water Act.

APPEAL:

I. Any affected party may ask for reconsideration of a permit decision in accordance with RSA 482-A:10,II within 20 days of the Department's issuance of a decision. Requests for reconsideration should:

- 1) describe in detail each ground for complaint. Only grounds set forth in the request for reconsideration can be considered at subsequent levels of appeal;
- 2) provide new evidence or information to support the requested action;
- 3) Parties other than the applicant, the town, or contiguous abutters must explain why they believe they are affected; and
- 4) Be mailed to the DES Wetlands Bureau, PO Box 95, Concord, NH 03302-0095.

II. An appeal of a decision of the department after reconsideration may be filed with the Wetlands Council in accordance with RSA 482-A:10, IV within 30 days of the department's decision. Filing of the appeal must:

- 1) be made by certified mail to Brian Fowler, Chairperson, Wetlands Council, PO Box 95, Concord, NH 03302-0095 (a copy should also be sent to the DES Wetlands Bureau);
- 2) contain a detailed description of the land involved in the department's decision; and
- 3) set forth every ground upon which it is claimed that the department's decision is unlawful or unreasonable.

MAJOR IMPACT PROJECT

2002-00898 MOUNTAIN VIEW DEVELOPMENT LLC, KEVIN CRAFFEY WHITEFIELD Unnamed Wetland

Requested Action:

Approve name change to: Great American Life Co., 250 East Fifth St., Cincinnati, Ohio 45202 per request received 5/27/2005.

Conservation Commission/Staff Comments:

*In a letter dated 5/2/02, NHI stated that there are no known occurrences of sensitive species near the project area.

*In a letter dated 5/23/02, NHDHR stated that the project will have "no adverse impacts" with regards to historical, archaeological and cultural resources.

*In a letter dated 8/13/04, the applicant agreed to allow DES a 7-day extension beyond the required 30-day second review process.

Inspection Date: 05/16/2002 by Craig D Rennie

Inspection Date: 11/19/2003 by Craig D Rennie

APPROVE NAME CHANGE:

Dredge and fill 115,594 square feet (2.65 acres) of palustrine forested/scrub-shrub wetlands to expand an existing 9-hole golf course to an 18-hole course layout. 90,550 square feet of forested wetlands will be cleared (during frozen conditions) and maintained as scrub-shrub wetlands to allow for fly-over golf play. Mitigate impacts on-site by restoring 3.83 acres of previously drained wetlands by removing drainage structures and installing wetland plantings; and by placing a deed restriction on 48.53 acres of land (37.23 acres of wetland, 11.3 acres of upland) which includes an undisturbed upland buffer along a large wetland complex. In addition, a donation will be provided (\$100,000) to assist The Nature Conservancy (TNC) in acquiring 500 acres of undeveloped land for conservation purposes adjacent to the Pondicherry National Wildlife Refuge.

With Conditions:

1. All work shall be in accordance with revised plans and application by Steven E. Cummings and by Schauer Environmental Consultants, as received by the Department on 11/5/03, 2/20/04, and on 2/16/05.
2. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.
3. The deed which accompanies the lots in this development shall contain condition #2 of this approval.
4. This permit shall not be effective until it has been recorded with the Registry of Deeds Office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau.
5. This permit is contingent on approval by the DES Site Specific Program.
6. The permittee shall notify DES and the Whitefield Conservation Commission in writing of their intention to begin construction no less than 5 business days prior to the commencement of construction.
7. At least 48 hours prior to the start of construction, a pre-construction meeting shall be held with DES Land Resources Management Program staff at the project site or at the DES Office in Concord, N.H. to review the conditions of this wetlands permit and the DES Site Specific Permit. It shall be the responsibility of the permittee to schedule the pre-construction meeting, and the meeting shall be attended by the permittee, his/her professional engineer(s), wetlands scientist(s), and the contractor(s) responsible for performing the work.
8. The permittee shall designate a qualified professional engineer or certified wetland scientist who will have the responsibility to ensure that the project is constructed in accordance with the approved plans, and that site monitoring and stabilization is accomplished in a timely fashion, and remedial measures are taken if necessary. The Wetlands Bureau shall be notified of the designated professional prior to the start of work and if there is a change of status during the project.
9. All clearing within wetlands to create proposed fly-over areas shall be limited to cutting vegetation during frozen conditions with no grading, stumping, rutting, or filling occurring within these areas.
10. No golf play or ball retrieval shall be allowed within fly-over wetland areas.
11. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
12. Orange construction fencing shall be placed at the limits of construction adjacent to wetland areas to prevent accidental encroachment on wetlands.

13. Work shall be done during low flow.
14. Discharge from dewatering of work areas shall be to sediment basins that are: a) located in uplands; b) lined with hay bales or other acceptable sediment trapping liners; c) set back as far as possible from wetlands and surface waters, in all cases with a minimum of 20 feet of undisturbed vegetated buffer.
15. Dredged material shall be placed outside of the DES Wetland Bureau's jurisdiction.
16. Proper headwalls shall be constructed within seven days of culvert installation.
17. Culvert outlets shall be properly rip rapped.
18. Within three days of final grading in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
19. Where construction activities have been temporarily suspended within the growing season, all exposed soil areas shall be stabilized within 14 days by seeding and mulching.
20. Where construction activities have been temporarily suspended outside the growing season, all exposed areas shall be stabilized within 14 days by mulching and tack. Slopes steeper than 3:1 shall be stabilized by matting and pinning.
21. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).
22. A post-construction report (with photographs) documenting the status of the completed project shall be submitted to the Wetlands Bureau within 60 days of the completion of construction. Photos should include all wetland areas that were cleared for fly-over golf play.

MITIGATION CONDITIONS:

RESTORATION:

23. This permit is contingent upon the restoration of 3.83 acres (166,836 square feet) of wetlands in accordance with plans received 02/16/05.
24. The schedule for construction of the restoration area shall coincide with site construction unless otherwise considered and authorized by the Wetlands Bureau.
25. The restoration area shall be properly constructed, monitored, and managed in accordance with approved final mitigation plans.
26. Wetland restoration areas shall be properly constructed, landscaped, monitored and remedial actions taken that may be necessary to create functioning wetland areas similar to those of the wetlands destroyed by the project. Remedial measures may include replanting, relocating plantings, removal of invasive species, changing soil composition and depth, changing the elevation of the wetland surface, and changing the hydrologic regime.
27. The permittee shall designate a qualified professional who will be responsible for monitoring and ensuring that the restoration areas are constructed in accordance with the restoration plan. Monitoring shall be accomplished in a timely fashion and remedial measures taken if necessary. The Wetlands Bureau shall be notified in writing of the designated professional prior to the start of work and if there is a change of status during the project.
28. The permittee or a designee shall conduct a follow-up inspection after the first growing season, to review the success of the restoration area and schedule remedial actions if necessary. A report outlining these follow-up measures and a schedule for completing the remedial work shall be submitted by December 1 of that year. Similar inspections, reports and remedial actions shall be undertaken in at least the second and third years following the completion of each mitigation site.
29. Wetland restoration areas shall have at least 75% successful establishment of wetlands vegetation after two (2) growing seasons, or shall be replanted and re-established until a functional wetland is replicated in a manner satisfactory to the DES Wetlands Bureau.

PRESERVATION:

30. This permit is contingent upon the execution of a deed restriction on 48.53 acres of land as depicted on plans received 02/16/05.
31. The deed restriction to be placed on the preservation areas shall be written to run with the land, and both existing and future property owners shall be subject to this restriction.
32. The preservation area shall be surveyed by a licensed surveyor, and marked by monuments [stakes] prior to construction.
33. There shall be no removal of the existing vegetative undergrowth within the preservation area and the placement of fill, construction of structures, and storage of vehicles or hazardous materials is prohibited.
34. Activities in contravention of the deed restriction shall be construed as a violation of RSA 482-A, and those activities shall be subject to the enforcement powers of the Department of Environmental Services (including remediation and fines).

DONATION:

35. This permit is contingent upon the donation of \$100,000 to TNC as a secure commitment towards providing compensatory mitigation for the proposed wetland impacts. Monies will be used by TNC to help acquire approximately 500 acres of undeveloped land for conservation purposes adjacent to the Pondicherry National Wildlife Refuge.

36. The permittee shall submit verification to DES that the monetary contribution has been donated to TNC prior to construction.

With Findings:

1. This permit transfer is issued in accordance with NH Administrative Rule Wt 502.03(b).

MINOR IMPACT PROJECT

2004-00697 EQUIVISE LLC
MEREDITH Unnamed Wetland

Requested Action:

Approve name change to: Meredith Crestwood LLC, PO Box 34, Pittsfield NH 03263 per request received 5/18/2005.

APPROVE NAME CHANGE:

Dredge and fill approximately 2,131 sq. ft. of forested wetland for construction of a roadway into a 63-lot subdivision on approximately 207.4 acres.

With Conditions:

1. All work shall be in accordance with the followings plans by HTA Companies:
 - a. The Proposed lot layout plan (Sheet 1 of 1) dated March 24, 2004 as received by the Department on April 22, 2004;
 - b. The Proposed Roadway Plan & Profile-1 (Sheet 12 of 29) and The Proposed Roadway Plan & Profile-8 (Sheet 19 of 29) dated March 18, 2004 with revisions through May 10, 2004 as received by the Department on June 7, 2004;
2. This permit is contingent on approval by the DES Site Specific Program.
3. This permit is contingent on approval by the DES Subsurface Systems Bureau.
4. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.
5. The deed which accompanies the sales transaction for each of the lots in this subdivision shall contain condition #4 of this approval.
6. This permit shall not be effective until it has been recorded with the county Registry of Deeds office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau prior to construction.
7. At least 48 hours prior to the start of construction, a pre-construction meeting shall be held with NHDES Land Resources Management Program staff at the project site or at the DES Office in Concord, N.H. to review the conditions of this wetlands permit and the NHDES Site Specific Permit. It shall be the responsibility of the permittee to schedule the pre-construction meeting, and the meeting shall be attended by the permittee, his/her professional engineer(s), wetlands scientist(s), and the contractor(s) responsible for performing the work.
8. Work shall be done during low flow conditions.
9. Orange construction fencing shall be placed at the limits of construction to prevent accidental encroachment on wetlands.
10. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
11. Proper headwalls shall be constructed within seven days of culvert installation.
12. Culvert outlets shall be properly rip rapped.
13. Within three days of final grading in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
14. Where construction activities have been temporarily suspended within the growing season, all exposed soil areas shall be stabilized within 14 days by seeding and mulching.

15. Where construction activities have been temporarily suspended outside the growing season, all exposed areas shall be stabilized within 14 days by mulching and tack. Slopes steeper than 3:1 shall be stabilized by matting and pinning.
16. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).

With Findings:

1. This permit transfer is issued in accordance with NH Administrative Rule Wt 502.03(b).

2004-03082 BYCO LLC, DALE & HARRY BLACKKEY
PLYMOUTH Unnamed Pond

Requested Action:

Dredge and fill 4262 square feet of palustrine forested wetland and 185 feet of intermittent stream for access in the development of 39 residential condominium units on 41.88 acres.

Conservation Commission/Staff Comments:

The Plymouth Conservation Commission did not comment on this application.

APPROVE PERMIT:

Dredge and fill 4262 square feet of palustrine forested wetland and 185 feet of intermittent stream for access in the development of 39 residential condominium units on 41.88 acres.

With Conditions:

1. All work shall be in accordance with plans by Fluet Engineering Associates dated August 24, 2004, and revised through April 26, 2005, as received by the Department on April 29, 2005, and Subdivision Plans by DMC Land Surveyors dated February 5, 2004, as received by the Department on March 11, 2005.
2. This permit is contingent on approval by the DES Site Specific Program.
3. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.
4. The deed which accompanies the sales transaction for each of the lots in this subdivision shall contain condition #3 of this approval.
5. This permit shall not be effective until it has been recorded with the Registry of Deeds Office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau.
6. At least 48 hours prior to the start of construction, a pre-construction meeting shall be held with NHDES Land Resources Management Program staff at the project site or at the DES Office in Concord, NH to review the conditions of this wetlands permit and the NHDES Site Specific Permit. It shall be the responsibility of the permittee to schedule the pre-construction meeting, and the meeting shall be attended by the permittee, his/her professional engineer(s), wetlands scientist(s), and the contractor(s) responsible for performing the work.
7. Work shall be done during low flow.
8. Appropriate siltation/erosion controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized.
9. Orange construction fencing shall be placed at the limits of construction to prevent accidental encroachment on wetlands.
10. Prior to commencing work on a substructure located within surface waters, a cofferdam shall be constructed to isolate the substructure work area from the surface waters.
11. Discharge from dewatering of work areas shall be to sediment basins that are: a) located in uplands; b) lined with hay bales or other acceptable sediment trapping liners; c) set back as far as possible from wetlands and surface waters, in all cases with a minimum of 20 feet of undisturbed vegetated buffer.
12. Work within the stream, inclusive of work associated with installation of a cofferdam, shall be done during periods of low flow., High flows can be caused by seasonal runoff or precipitation; the permittee shall monitor local forecasts to review weather conditions.
13. No work within the confined area shall proceed until the cofferdam is fully effective, and water flow is controlled.

14. Temporary cofferdams shall be entirely removed immediately following construction.
15. Dredged material shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
16. Proper headwalls shall be constructed within seven days of culvert installation.
17. Culvert outlets shall be protected in accordance with the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).
18. Within three days of final grading in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
19. Where construction activities have been temporarily suspended within the growing season, all exposed soil areas shall be stabilized within 14 days by seeding and mulching.
20. Where construction activities have been temporarily suspended outside the growing season, all exposed areas shall be stabilized within 14 days by mulching and tack. Slopes steeper than 3:1 shall be stabilized by matting and pinning.
21. Silt fencing must be removed once the area is stabilized.
22. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).

With Findings:

1. This is a minor impact project per Administrative Rule Wt 303.03(h), projects involving less than 20,000 square feet of alteration in the aggregate in nontidal wetlands, nontidal surface waters, or banks adjacent to nontidal surface waters which exceed the criteria of Wt 303.04(f); and Rule Wt 303.03(l), projects that alter the course of or disturb less than 200 linear feet of an intermittent or perennial nontidal stream or river channel or its banks and do not meet the criteria for minimum impact under Wt 303.04(n). 2. The applicant has impacted the wetlands as high on the watershed as possible, has limited the number of crossings and all crossings are for access.
3. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
4. The applicant has provided an open bottom culvert in the lower crossing to reduce impacts to the most important resource.
5. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
6. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(a) Requirements for Application Evaluation, has been considered in the design of the project.
7. DES Staff conducted a field inspection of the proposed project on December 15, 2004. Field inspection determined the larger wetlands had been altered in the past for agricultural use, the existing pond was an old man made burrow pit with little function or value and the drainages at the upper crossing did not have a stream channel.
8. The applicant has met all the requirements of Rule Wt 304.09.

**2005-00172 CARGILL BLAKE CONSTRUCTION, WILLIAM CARGILL
MEREDITH Lake Winnepesaukee**

Requested Action:

Replace an existing 14 ft 2 in x 35 ft 6 in boathouse with a 14 ft 2 in x 35 ft 3 in boathouse, reduce area of associated crib supported docks by 192 sq ft, install two fender pilings and two ice clusters, replace beach access steps, install two PWC lifts and install 6 ft wide dug in lake access steps from proposed 29 ft 6 in x 27 ft perched beach on 164 ft of frontage on Lake Winnepesaukee.

APPROVE PERMIT:

Replace an existing 14 ft 2 in x 35 ft 6 in boathouse with a 14 ft 2 in x 35 ft 3 in boathouse, reduce area of associated crib supported docks by 192 sq ft, install two fender pilings and two ice clusters, replace beach access steps, install two PWC lifts and install 6 ft wide dug in lake access steps from proposed 29 ft 6 in x 27 ft perched beach on 164 ft of frontage on Lake Winnepesaukee.

With Conditions:

1. All work shall be in accordance with plans by Watermark Marine as received by the Department on January 24, 2005 and "Tree Cutting Sit Plan" dated May 11, 2005 as received by the Department on May 16, 2005.

2. This permit shall not be effective until it has been recorded with the Registry of Deeds Office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau prior to construction.
3. This permit to replace or repair existing structures shall not preclude the Department of Environmental Services from taking any enforcement action or revocation action if the Department of Environmental Services later determines that these "existing structures" were not previously permitted or grandfathered.
4. Appropriate siltation and erosion controls shall be in place prior to construction, maintained during construction, and shall remain until the area is stabilized.
5. Work authorized shall be carried out such that discharges in spawning or nursery areas during spawning seasons shall be avoided, and impacts to such areas shall be avoided or minimized to the maximum extent practicable during all times of the year.
6. Existing crib rocks shall be used for crib replacement. No additional rocks.
7. All construction related debris, dredged or excavated material shall be placed outside of the DES Wetlands Bureau jurisdiction.
8. Stone placed along the beach front for the purpose of retaining sand shall be placed above and/or landward of those rocks currently located along the normal high water line (Elevation 504.32). Those rocks existing at the normal high water line shall remain otherwise undisturbed such that the pre-existing shoreline remains identifiable.
9. The steps installed for access to the water shall be located completely landward of the normal high water line.
10. No more than 10 cu yd of sand may be used and all sand shall be located above the normal high water line.
11. This permit shall be used only once, and does not allow for annual beach replenishment.
12. The permittee shall provide appropriate diversion of surface water runoff to prevent erosion of beach area.
13. Revegetation of trees, shrubs and ground covers representing the density and species diversity of the existing stand of vegetation removed for this project shall begin at a distance no greater than 5 feet landward from the beach area.
14. These shall be the only docking structures on this water frontage and all portions of these structures shall be at least 20 ft from the abutting property lines or the imaginary extension of those lines into the water.
15. Appropriate turbidity controls shall be installed prior to construction, shall be maintained during construction such that no turbidity escapes the immediate dredge area, and shall remain until suspended particles have settled and the water at the work site has returned to normal clarity.
16. Unnecessary removal of shoreline vegetation shall be prohibited. Exceeding the proposed cutting shall be in violation of this permit.
17. All activity shall be in accordance with the Comprehensive Shoreland Protection Act, RSA 483-B (see attached fact sheet).

With Findings:

1. This is a minor impact project per Administrative Rule Wt 303.03(d), modification of a 3-slip docking structure.
2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(a). Requirements for application evaluation, has been considered in the design of the project.
5. DES Staff conducted a field inspection of the proposed project on April 1, 2005. Field inspection determined cribs and boathouse dock widths will be reduced in accordance with Administrative Rule Wt 404.22.
6. The applicant has submitted evidence that the work on the frontage will be compliant with the Comprehensive Shoreland Protection Act, RSA 483-B.

2005-00299 WOODWARD, GARY & LYNN
DERRY Unnamed Wetland

Requested Action:

Dredge and fill 5,123 square feet of wetlands to install a 15" x 45' culvert and a 15" x 20' culvert to construct a common driveway crossing serving two residential lots.

Conservation Commission/Staff Comments:

Conservation Commission did not report.

APPROVE PERMIT:

Dredge and fill 5,123 square feet of wetlands to install a 15" x 45' culvert and a 15" x 20' culvert to construct a common driveway crossing serving two residential lots.

With Conditions:

1. All work shall be in accordance with plans by Bedford Design Consultants, Inc. dated 1/12/2005, as received by the Department on 2/14/2005, and per supporting materials submitted by Bedford Design Consultants as received by the Department on May 5, 2005.
2. This permit is contingent on approval by the DES Subsurface Systems Bureau.
3. Dredged material shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
4. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.
5. Orange construction fencing shall be placed at the limits of construction to prevent accidental encroachment on wetlands.
6. Proper headwalls shall be constructed within seven days of culvert installation.
7. This permit shall not be effective until it has been recorded with the county Registry of Deeds office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau prior to construction.
8. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
9. Within three days of final grading or temporary suspension of work in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
10. Work shall be done during low flow.

With Findings:

1. This is a minor impact project per Administrative Rule Wt 303.03(h), projects with less than 20,000 square feet of alteration in the aggregate of non-tidal wetlands that exceed the criteria of Wt 302.04(f).
 2. The need for the proposed impacts has been demonstrated by the applicants per Wt 302.01. The applicants have submitted documentation to demonstrate that the location of this common driveway was determined at a time (1989) when the wetland was not found to be as extensive as the current delineation represents. NH DOT approved the common drive in its location in 1989, and re-approved the common drive in the same location in February 2005, with the statement that no further driveways would be allowed for the original parcel. Alteration of the location is further hindered by an additional easement in the driveway location and to its south, held by Verizon, who will not allow adjustment of the driveway to the south of its NHDOT approved location.
 3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03, given all other restricting factors. Relocation of the driveway to the northerly limit of the Woodward lot is not possible due to unsafe sight distance per NHDOT.
 4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(a) Requirements for Application Evaluation, has been considered in the design of the project.
- DES has coordinated with NH Fish & Game Non-Game and Endangered Species Program on this project with respect to the spotted turtle and the proposed culvert size.

2005-00503 PREVETT JR, ANTHONY J. & MARY E.
LACONIA Lake Winnepesaukee

Requested Action:

Repair two existing 5 ft by 65 ft piling supported docks connected by a 12 ft by 11 ft walkway, with a 15 ft 8 in by 30 ft boathouse, dredge 4 rocks from the lakebed, retain an existing boatlift in the center slip, and two single PWC lifts adjacent to the shoreline near the southern property line on 100 ft of frontage on Lake Winnepesaukee, Laconia.

Conservation Commission/Staff Comments:

Con Com has not submitted comments by 05/30/05

APPROVE PERMIT:

Repair two existing 5 ft by 65 ft piling supported docks connected by a 12 ft by 11 ft walkway, with a 15 ft 8 in by 30 ft boathouse,

dredge 4 rocks from the lakebed, retain an existing boatlift in the center slip, and two single PWC lifts adjacent to the shoreline near the southern property line on 100 ft of frontage on Lake Winnepesaukee, Laconia.

With Conditions:

1. All work shall be in accordance with plans by Watermark Marine Construction dated February 8, 2005, as received by the Department on March 15, 2005.
2. This permit shall not be effective until it has been recorded with the Registry of Deeds Office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau prior to construction.
3. This permit to replace or repair existing structures shall not preclude the Department of Environmental Services from taking any enforcement action or revocation action if the Department of Environmental Services later determines that these "existing structures" were not previously permitted or grandfathered.
4. Repair shall maintain existing size, location and configuration.
5. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, maintained during construction, and shall remain until the area is stabilized.
6. Work authorized shall be carried out such that discharges in spawning or nursery areas during spawning seasons shall be avoided, and impacts to such areas shall be avoided or minimized to the maximum extent practicable during all times of the year.
7. Work shall be carried out in a time and manner such that disturbance to migratory waterfowl breeding areas and spawning areas shall be avoided.
8. Additional expedited minimum impact applications shall be accepted for the subject property for a period of 12 months only if the applicant demonstrates by plan that the additional project(s) are wholly unrelated or separate from the original application and when considered with the original application are not classified as minor or major.
9. Dredged material shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
10. This permit does not allow for any dredging of boatslips on the frontage.
11. Seasonal PWC lifts shall be removed for the non-boating season.
12. All activity shall be in accordance with the Comprehensive Shoreland Protection Act, RSA 483-B (see attached fact sheet).

With Findings:

1. This is a minor impact project per Administrative Rule Wt 303.03(g), removal of no more than 20 cy of material from the lakebed.
2. NH Fish and Game and NHI will not be submitting comments.

2005-00627 LARSON, DONALD & MARY
MEREDITH Lake Winnepesaukee

Requested Action:

Replace two existing 6 ft x 24 ft seasonal docks with two 6 ft x 34 ft seasonal docks, repair existing permanent 6 ft x 23 ft 11 in piling supported permanent walkway, install a seasonal boatlift within the center slip covered with a 14 ft x 30 ft seasonal canopy on 200 ft of frontage on Lake Winnepesaukee.

APPROVE PERMIT:

Replace two existing 6 ft x 24 ft seasonal docks with two 6 ft x 34 ft seasonal docks, repair existing permanent 6 ft x 23 ft 11 in piling supported permanent walkway, install a seasonal boatlift within the center slip covered with a 14 ft x 30 ft seasonal canopy on 200 ft of frontage on Lake Winnepesaukee.

With Conditions:

1. All work shall be in accordance with plans by Watermark Marine Construction as revised May 10, 2005 and received by the Department on May 16, 2005.
2. This permit shall not be effective until it has been recorded with the Registry of Deeds Office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau prior to construction.
3. Repairs to permanent 6 ft x 23 ft 11 in walkway shall maintain existing size, location and configuration.
4. Seasonal piers shall not extend further than 40 ft from the normal high water mark.

5. This permit to replace or repair existing structures shall not preclude the Department of Environmental Services from taking any enforcement action or revocation action if the Department of Environmental Services later determines that these "existing structures" were not previously permitted or grandfathered.
6. Appropriate siltation/erosion/turbidity controls where needed shall be in place prior to construction, maintained during construction, and shall remain until the area is stabilized.
7. Work authorized shall be carried out such that discharges in spawning or nursery areas during spawning seasons shall be avoided, and impacts to such areas shall be avoided or minimized to the maximum extent practicable during all times of the year.
8. Work shall be carried out in a time and manner such that disturbance to migratory waterfowl breeding areas and spawning areas shall be avoided.
9. All seasonal structures shall be removed for 5 months during the non-boating season.
10. Canopies shall be of seasonal construction type with a flexible fabric cover which shall be removed for the non-boating season.
11. This permit does not allow for maintenance dredging.
12. These shall be the only structures on this water frontage and all portions of the dock shall be at least 20 ft from the abutting property lines or the imaginary extension of those lines into the water.
13. All activity shall be in accordance with the Comprehensive Shoreland Protection Act, RSA 483-B (see attached fact sheet).

With Findings:

1. This is a minor impact project per Administrative Rule Wt 303.03(d), construction or modification of a 3-slip docking system.
2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(a) Requirements for Application Evaluation, has been considered in the design of the project.

2005-00973 MYEROW, MICHAEL
RYE Atlantic Ocean

Requested Action:

Remove and regrade 6,000 sq. ft. of accumulated beach sand along 200 linear feet of a 240 linear foot seawall to provide better exposure of the seawall to protect the property from ocean waves. The sand will be pulled back from the seawall and regraded along the dry sand portion of the beach landward of mean high tide along this frontage.

Conservation Commission/Staff Comments:

" The [Rye Conservation] Commission had no problem with the request to remove sand build up from 200 ft. of the central portion of the seawall leaving 20 ft. on each end of the wall."

Inspection Date: 05/18/2005 by Frank D Richardson

APPROVE PERMIT:

Remove and regrade 6,000 sq. ft. of accumulated beach sand along 200 linear feet of a 240 linear foot seawall to provide better exposure of the seawall to protect the property from ocean waves. The sand will be pulled back from the seawall and regraded along the dry sand portion of the beach landward of mean high tide along this frontage.

With Conditions:

1. All work shall be in accordance with plans by Applicant as received by the Department on May 10, 2005.
2. Any future work on this property that is within the jurisdiction of the DES Wetlands Bureau as specified in RSA 482-A will require a new application and approval by the Bureau.
3. Work authorized under this permit may be implemented annually.
4. Sand removed from the face of the seawall shall be regraded on the remaining dry sand area of the beach landward of mean high tide.
5. The sand removed from the face of the seawall shall be graded to match existing beach contours.
6. No sand shall be removed from the beach for disposal elsewhere.

7. Wood, seaweed, or other accumulated debris may be removed from the beach and disposed of outside of any area within DES Wetlands Bureau jurisdiction.
8. NH DES Coastal Region staff shall be notified in writing prior to commencement of work and upon its completion each time work is done.

With Findings:

1. This is a minor impact project per Administrative Rule Wt 303.03(a).
2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
4. DES Staff conducted a field inspection of the proposed project on May 18, 2005. Field inspection determined this project will have no deleterious affect on the beach or other resource areas in the environs.

MINIMUM IMPACT PROJECT

2002-00768 NH FISH & GAME DEPARTMENT
MARLOW Sand Pond

Requested Action:

Amend permit for the addition of a 4 ft by 4 ft by 12 ft cast in place concrete anchor at the most landward end of the boatramp.

Conservation Commission/Staff Comments:

No comments from the Conservation Commission.

APPROVE AMENDMENT:

Repair existing 12' x 50' boat ramp on Sand Pond, Marlow

With Conditions:

1. All work shall be in accordance with plans by Fay, Spofford & Thorndike, LLC. dated January 3, 2005, as received by the Department on Febraury 28, 2005..
2. Any further alteration of areas on this property that are within the jurisdiction of the DES Wetlands Bureau will require a new application and further permitting by the Bureau.
3. Work shall be done during draw down.
4. Appropriate siltation/erosion/turbidity controls, including a turbidity curtain, shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized.
5. Repair shall maintain existing size, location and configuration.
6. There shall be no cutting of trees or removal of any stumps from the bank except for the area within which construction of the ramp will take place.
7. The ramp approach shall be crowned so that drainage is directed away from the slope of the ramp.
8. This permit shall not be effective until it has been recorded with the Registry of Deeds Office by the Permittee.
9. A copy of the registered permit shall be submitted to the DES Wetlands Bureau prior to construction.
10. All activity shall be in accordance with the Comprehensive Shoreland Protection Act, RSA 483-B (see attached fact sheet).

With Findings:

1. This project is classified as a minimum impact project per Rule Wt 303.04(v), repair of existing structures with no change in size, location or configuration.

**2002-00769 NH FISH & GAME DEPARTMENT
CAMBRIDGE Umbagog Lake**

Requested Action:

Amend permit to include the addition of a 4 ft by 4 ft by 12 ft concrete anchor at the most landward end of the boatramp.

Conservation Commission/Staff Comments:

No comments received from the Cambridge Conservation Commission.

APPROVE AMENDMENT:

Dredge and fill 1518 sqft of bank and bed to repair a public boat ramp on Umbagog Lake in Cambridge (damaged by winter ice movement) by replacing the existing 1-foot wide by 12-foot long concrete planks with larger, re-designed 3-foot wide by 12-foot long concrete planks, replace class "C" bedding stone and add a 4 ft by 4 ft by 12 ft concrete anchor at the most landward end of the boatramp.

With Conditions:

1. All work shall be in accordance with plans by the New Hampshire Fish & Game Department dated January 3, 2005, as received by the Department on February 28, 2005.
2. Any further alteration of areas on this property that are within the jurisdiction of the DES Wetlands Bureau will require a new application and further permitting by the Bureau.
3. Work shall be conducted during low lake level conditions.
4. Appropriate siltation/erosion/turbidity controls, including a turbidity curtain, shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized.
5. Upland and bank areas landward of the boat ramp shall not be disturbed by regrading or filling, to minimize the potential for erosion of materials into Lake Umbagog.
6. There shall be no cutting of trees or removal of any stumps from the bank except for the area within which construction of the ramp will take place.
7. The boat ramp shall be utilized indefinitely as a public access to Lake Umbagog and shall not change in use.
8. This permit shall not be effective until it has been recorded with the county Registry of Deeds office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau prior to construction.
9. All activity shall be in accordance with the Comprehensive Shoreland Protection Act, RSA 483-B (see attached fact sheet).

With Findings:

1. This project is classified as a minimum impact project per Rule Wt 303.04(v).
2. The project was necessary to restore the safety and availability of this boat ramp on Umbagog Lake to full use by the public.
3. Emergency authorization for this work was issued by DES Wetlands Bureau Staff on 4/19/02.
4. Review of the application submitted pursuant the emergency authorization indicates that work has been completed in accordance with the emergency authorization.
5. The proposed modifications of the planks will prevent future maintenance of the boat ramp.

**2004-01306 HOVASSE REALTY TRUST
ALTON Sunset Lake**

Requested Action:

Dredge and fill 1500 square feet along 127 linear feet of intermittent stream for septic setback and lot development.

APPROVE PERMIT:

Dredge and fill 1500 square feet along 127 linear feet of intermittent stream for septic setback and lot development.

With Conditions:

1. All work shall be in accordance with plans by KLC Land Planning and Consulting dated March 2004, and revised through

December 2004, as received by the Department on January 10, 2005.

2. This permit is contingent on approval by the DES Subsurface Systems Bureau.
3. This permit is contingent on receipt of a letter of consent from the town of Alton to tie into the existing culvert under Sunset Shore Dr.
4. This applicant shall submit a copy of the recorded easement for repair and maintenance of the proposed structure prior to the start of construction.
5. The permittee shall notify DES and the local conservation commission in writing of their intention to commence construction no less than 5 business days prior to construction.
6. Work shall be done during periods of non-flow.
7. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
8. Proper headwalls shall be constructed within seven days of culvert installation.
9. Within three days of final grading or temporary suspension of work in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
10. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).
11. Wetland treatment basins shall have at least 75% successful establishment of wetlands vegetation after two (2) growing seasons, or shall be replanted and re-established until a functional wetland is replicated in a manner satisfactory to the DES Wetlands Bureau.
12. The permittee shall attempt to control invasive, species as listed by the Department of Agriculture by measures agreed upon by the Wetlands Bureau. If a listed species is found in the treatment basins during construction and during the early stages of vegetative establishment.
13. A post-construction report documenting the status of the completed project with photographs of the completed basins shall be submitted to the Wetlands Bureau within 60 days of the completion of construction.
14. All activity shall be in accordance with the Comprehensive Shoreland Protection Act, RSA 483-B (see attached fact sheet).
15. No stumps shall be removed within 50 feet of the reference line per RSA 483-B (see attached fact sheet).

With Findings:

1. This is a minor impact project per Administrative Rule Wt 303.03(1); Projects that alter the course of or disturb less than 200 linear feet of an intermittent or perennial nontidal stream or river channel or its banks and do not meet the criteria for minimum impact under Wt 303.04(n).
2. DES Wetlands staff conducted a site inspection of this proposed project area on September 22, 2004. This investigation concluded that the drainage is an intermittent stream which has been previously altered with the construction of Sunset Shore Rd. and other activities on the property.
3. The main function of the intermittent stream is as a watercourse transporting seasonal flows from the upstream watershed to the lake.
4. The secondary functions of the intermittent stream is water quality and nutrient uptake prior to entering the lake.
5. The applicant has provided a culvert to maintain the hydrological connection of the intermittent stream.
6. The applicant has provided two vegetated plunge pools at the terminus of the culvert to replicate the water quality functions of the intermittent stream.
7. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(a) Requirements for Application Evaluation, has been considered in the design of the project.
8. The conservation commission has not commented on this project as designed.

2004-01814 OSHAUGHNESSY, DEANNA
ALTON Unnamed Wetland

Requested Action:

Restore 1061 square feet of palustrine forested wetland and retain 921 square feet of impact for access and well installation, and temporarily impact 180 square feet for installation of weirs to monitor surface water levels during a drawdown test for a large groundwater withdrawal.

Conservation Commission/Staff Comments:

The conservation commission provided comments for the application please see the findings.

APPROVE AMENDMENT:

Restore 1061 square feet of palustrine forested wetland and retain 921 square feet of impact for access and well installation, and temporarily impact 180 square feet for installation of weirs to monitor surface water levels during a drawdown test for a large groundwater withdrawal.

With Conditions:

1. All work shall be in accordance with plans by Schauer Environmental Consultants dated August 1, 2004, and revised through August 12, 2004, as received by the Department on October 8, 2004.
2. This permit is contingent on approval of the large groundwater withdrawal by DES Water Supply Engineering Bureau.
3. Any future work on this property that is within the jurisdiction of the DES Wetlands Bureau as specified in RSA 482-A will require a new application and approval by the Bureau.
4. Work shall be done during low flow.
5. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
6. The weirs shall be installed in accordance with the requirements of the DES Groundwater Protection Bureau.
7. The weirs shall be installed for no greater than thirty consecutive days in total unless specifically authorized in writing by the Wetlands Bureau.
8. The permittee or a designee shall provide a post-construction report documenting the status of the restored streambed and banks to the Wetlands Bureau within 60 days of the completion of construction.
9. The permittee or a designee shall conduct a follow-up inspection of all restored wetlands and weir areas after the first growing season, to review the success of the restored areas and schedule remedial actions if necessary. A report outlining these follow-up measures and a schedule for completing the remedial work shall be submitted by December 1 of that year. Similar inspections, reports and remedial actions shall be undertaken in at least the second and third years following the completion of each restoration site.
10. Wetland replication area shall have at least 75% successful establishment of wetlands vegetation after two (2) growing seasons, or it shall be replanted and re-established until a functional wetland is replicated in a manner satisfactory to the DES Wetlands Bureau.

With Findings:

The department reaffirms findings 1-8 of the original approval and makes the following additional findings:

9. The installation of the weirs is required as part of the Large Groundwater Withdrawal Permit process.

**2004-02690 NH DEPT OF TRANSPORTATION
NORTH HAMPTON Winnicut River**

Requested Action:

Replace a 58 in. x 36 in. x 102 ft. CMP arch culvert impacting 792 sq. ft. (600 sq. ft. temporary).

APPROVE PERMIT:

Replace a 58 in. x 36 in. x 102 ft. CMP arch culvert impacting 792 sq. ft. (600 sq. ft. temporary). NHDOT project #M612.

With Conditions:

1. All work shall be in accordance with plans by NHDOT dated 10-12-04 as received by the Department on Nov. 4, 2004, per amended plans received on March 14, 2005 and the memo received on March 17, 2005.
2. Dredged material shall be placed out of the DES Wetlands Bureau jurisdiction.
3. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized.
4. Construction equipment shall not be located within surface waters.

5. Within three days of final grading in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
6. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).
7. Extreme precautions to be taken within riparian areas to limit unnecessary removal of vegetation during road construction and areas cleared of vegetation to be revegetated as quickly as possible.
8. There shall be no further alteration to wetlands or surface waters without amendment of this permit.
9. Proper headwalls shall be constructed within seven days of culvert installation.
10. Work shall be done during low flow.

With Findings:

1. This is a minor impact project per Administrative Rule Wt 303.03(l), alteration of more than 50 linear feet of banks and stream.
2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(a) Requirements for Application Evaluation, has been considered in the design of the project.
5. The mechanically placed sandbags will replace the sheet piles due to the overhead utilities.
6. There project will not impact the species identified by the Natural Heritage Inventory, as there will be no changes in hydrology.

2005-00363 K VENTURES LLC
HUDSON Unnamed Wetland

Requested Action:

Dredge and fill 620 sq. ft. of palustrine forested/scrub-shrub wetlands to install an 18-inch x 50-foot culvert for a driveway crossing to access one lot of a three-lot residential subdivision on 11.09 acres.

APPROVE PERMIT:

Dredge and fill 620 sq. ft. of palustrine forested/scrub-shrub wetlands to install an 18-inch x 50-foot culvert for a driveway crossing to access one lot of a three-lot residential subdivision on 11.09 acres.

With Conditions:

1. All work shall be in accordance with plans by Maynard & Paquette dated 10/22/04, revised 5/18/05, as received by NH DES on 5/25/05.
2. This permit is contingent on approval by the DES Subsurface Systems Bureau.
3. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.
4. The deed which accompanies the sales transaction for each of the lots in this subdivision shall contain condition # 6 of this approval.
5. Work shall be done during low flow.
6. Orange construction fencing shall be placed at the limits of construction to prevent accidental encroachment on wetlands.
7. Proper headwalls shall be constructed within seven days of culvert installation.
8. Within three days of final grading or temporary suspension of work in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
9. Where construction activities have been temporarily suspended within the growing season, all exposed soil areas shall be stabilized within 14 days by seeding and mulching.
10. Where construction activities have been temporarily suspended outside the growing season, all exposed areas shall be stabilized within 14 days by mulching and tack. Slopes steeper than 3:1 shall be stabilized by matting and pinning.
11. Silt fencing must be removed once the area is stabilized.

With Findings:

1. This is a minimum impact project per Administrative Rule Wt 303.04(f), alteration of less than 3,000 square feet in swamps.
2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.
5. This wetland impact was previously approved under 1999-project was

JACKSON Unnamed Wetland

Requested Action:
Approve name change to: Patrick van der Voorn, 3 Salen St. Ave., Charlestown , Ma 02129 per request received 5/27/2005.

APPROVE NAME CHANGE:

Install one 24'x 12" culvert and one 20'x 36" culvert within an existing roadway to provide driveway access to a single family building lot.

With Conditions:

1. All work shall be in accordance with plans by the applicant as received by the Department on August 30, 2000.
2. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.
3. Proper headwalls shall be installed.
4. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized.
5. Work shall be done during low flow.

With Findings:

1. This permit transfer is issued in accordance with NH Administrative Rule Wt 502.03(b).

2004-02850 DARABANT JR, ROBERT & ELIZABETH
LACONIA Lake Winnepesaukee

Requested Action:

Amend permit changing the supporting structures to pilings.

Conservation Commission/Staff Comments:

Con Com signed Expedited Application.

APPROVE AMENDMENT:

Repair an existing 6 ft 3 in by 36 ft piling supported dock connected to a 6 ft 2 in by 35 ft piling supported dock by a 6 ft by 12 ft 4 in walkway, accessed by a 5 ft 4 in by 59 ft 4 in piling supported walkway, the southern dock has a 2 ft 3 in by 18 ft 8 in offset, with a 13 ft 5 in by 28 ft 1 in permanent open sided boathouse over the center slip.

With Conditions:

1. All work shall be in accordance with plans by DeGrace Design dated October 29, 2004, as received by the Department on November 29, 2004 and amendment plans dated April 25, 2005, revision date May 6, 2005, as received by the Department on May 6, 2005.
2. This permit shall not be effective until it has been recorded with the Registry of Deeds Office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau prior to construction.
3. Removal of the 2 ft 3 in by 18 ft 8 in offset from the southern dock, within the 20 ft setback from property lines has not been approved at the request of the affected abutter. Removal or failure to construct this offset will be considered to be a willful and knowing violation to this permit and RSA 482-A and will subject to compliance action as such.
4. This permit to replace or repair existing structures shall not preclude the Department of Environmental Services from taking any enforcement action or revocation action if the Department of Environmental Services later determines that these "existing structures" were not previously permitted or grandfathered.
5. Repairs to these structures may be conducted, as necessary, throughout the duration of this permit provided that the permittee notifies the Wetlands Bureau and Conservation Commission, in writing, of the proposed start and completion date prior to performing any repair.
6. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, maintained during construction, and shall remain until the area is stabilized.
7. Additional expedited minimum impact applications shall be accepted for the subject property for a period of 12 months only if the applicant demonstrates by plan that the additional project(s) are wholly unrelated or separate from the original application and when considered with the original application are not classified as minor or major.
8. Repair shall maintain existing size, location and configuration. No modifications from approved plan.
9. All construction-related debris shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
10. Existing rocks which have fallen shall be used for repair. No Additional Rocks.

11. Repair shall maintain existing size, location and configuration.
12. This permit does not allow for maintenance dredging.
13. All activity shall be in accordance with the Comprehensive Shoreland Protection Act, RSA 483-B (see attached fact sheet).

With Findings:

1. This project is classified as a minimum impact project per Rule Wt 303.04(v), repair of existing structures with no change in size, location or configuration.
2. The abutter requested an inspection by Bureau personnel. This is a repair of a grandfathered structure with no changes. Inspection is not required by Bureau staff.
3. The existing structures were constructed prior to the effective date of the current 20 ft setback to property lines. Retroactive application of the 20 ft setback to the structure to be repair would be inappropriate.
4. The proposed repairs will not result in any increased encroachment on the 20 ft setback to property lines.
5. The replacement of the cribs with pilings will not adversely affect currents or the transport of sediment along this shoreline.

2005-00170 PLYMOUTH, TOWN OF
PLYMOUTH Unnamed Wetland

Requested Action:

Impact a total of 2,726 square feet within the bed and banks of two (2) perennial streams and three (3) intermittent streams to upgrade Highland Street for public safety.

Conservation Commission/Staff Comments:

The Plymouth Conservation Commission signed the Minimum Impact Expedited Application.

APPROVE PERMIT:

Impact a total of 2,726 square feet within the bed and banks of two (2) perennial streams and three (3) intermittent streams to upgrade Highland Street for public safety.

With Conditions:

1. All work shall be in accordance with plans by SEA Consultants Inc. dated December 16, 2004, as received by the Department on January 26, 2005.
2. Record the plans with drainage easements for each appropriate site within 10 days from receipt of this decision and submit a certified receipt from the Grafton County Registry of Deeds to the DES Wetlands Bureau.
3. Any further alteration of areas on this property that are within the jurisdiction of the DES Wetlands Bureau will require a new application and further permitting by the Bureau.
4. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).
5. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
6. Unconfined work within the streams, exclusive of work associated with installation of a cofferdam, shall be done during periods of low flow.
7. Cofferdams shall not be installed during periods of high flow, whether due to seasonal runoff or precipitation. Once a cofferdam is fully effective, confined work can proceed without restriction.
8. Discharge from dewatering of work areas shall be to sediment basins that are: a) located in uplands; b) lined with hay bales or other acceptable sediment trapping liners; c) set back as far as possible from wetlands and surface waters, in all cases with a minimum of 20 feet of undisturbed vegetated buffer.
9. Temporary cofferdams shall be entirely removed immediately following construction.
10. Proper headwalls shall be constructed within seven days of culvert installation.
11. Culvert outlets shall be properly rip rapped.
12. Within three days of final grading in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting

and pinning on slopes steeper than 3:1.

13. Where construction activities have been temporarily suspended within the growing season, all exposed soil areas shall be stabilized within 14 days by seeding and mulching.

14. Where construction activities have been temporarily suspended outside the growing season, all exposed areas shall be stabilized within 14 days by mulching and tack. Slopes steeper than 3:1 shall be stabilized by matting and pinning.

With Findings:

1. This is a minimum impact project per Administrative Rule Wt 303.04(j) Projects located within the right-of-way of a public road that do not impact bogs, marshes, sand dunes, tidal wetlands, or undisturbed tidal buffer zone, prime wetlands or do not meet the requirements of Wt 303.02(k).

2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.

3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.

4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.

2005-00360 COLALUCA, AARON/GINA
BARTLETT Unnamed Wetland

Requested Action:

Dredge and fill 230 square feet including installation of two 24-inch x 25 foot culverts, in a palustrine forested wetland for access to a proposed single family residence.

Conservation Commission/Staff Comments:

The conservation commission signed this minimum impact application.

APPROVE PERMIT:

Dredge and fill 230 square feet including installation of two 24-inch x 25 foot culverts, in a palustrine forested wetland for access to a proposed single family residence.

With Conditions:

1. All work shall be in accordance with plans by BH Keith and Associates dated June 1, 2005, as received by the Department on June 1, 2005.

2. This permit is contingent on approval by the DES Subsurface Systems Bureau.

3. Work shall be done during periods of non-flow.

4. Appropriate siltation/erosion controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.

5. Proper headwalls shall be constructed within seven days of culvert installation.

6. Culvert outlets shall be protected in accordance with the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).

7. Within three days of final grading or temporary suspension of work in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.

With Findings:

1. This is a minimum impact project per Administrative Rule Wt 303.04(f), projects involving alteration of less than 3000 square feet in swamps or wet meadows that are not in prime wetlands or do not meet the requirements of Wt 303.02(k), provided that no previous department permit has placed restrictions on the property of the applicant.

2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.

3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.

2005-00389

ALTON BAY CAMPMEETING ASSOC, DEAN SKINNER

ALTON BAY Lake Winnepesaukee

Requested Action:

Replace 251 linear ft of retaining wall behind an existing association beach along frontage in Rand Cove, in Alton, on Lake Winnepesaukee.

APPROVE PERMIT:

Replace 251 linear ft of retaining wall behind an existing association beach along frontage in Rand Cove, in Alton, on Lake Winnepesaukee.

With Conditions:

1. All work shall be in accordance with plans by Alton Bay Campmeeting Association as received by the Department on April 18, 2005 and construction sequence as received by the Department on May 16, 2005.
2. Retaining wall repair shall maintain existing size, location and configuration.
3. Stormwater runoff shall be diverted away from the beach to prevent erosion.
4. All machinery shall be used from the bank side of the retaining wall to avoid further shoreline impact.
5. This permit does not allow beach replenishment.
6. No walkways or stairs shall exceed 6 ft in width.
7. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
8. This permit shall not preclude the Department of Environmental Services (DES) from taking any enforcement action or revocation action if the DES later determines that these "existing structures" were not previously permitted or grandfathered.
9. All activity shall be in accordance with the Comprehensive Shoreland Protection Act, RSA 483-B (see attached fact sheet).

With Findings:

1. This is a minimum impact project per Administrative Rule Wt 303.04(c), repair or replacement of existing retaining walls performed "in the dry".
2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.

2005-00512

CHIVERS, BOYD

CANDIA Unnamed Stream

Requested Action:

Construct a 12' wide (travel width) crossing with 3:1 side slopes, approximately 50' long, and install a 36" culvert to provide access to a wood lot area of the property.

Conservation Commission/Staff Comments:

Conservation Commission signed expedited application.

Inspection Date: 05/01/2005 by Dori A Wiggin

DENY PERMIT:

Construct a 12' wide (travel width) crossing with 3:1 side slopes, approximately 50' long, and install a 36" culvert to provide access to a wood lot area of the property.

With Findings:

1. On March 18, 2005 the Department of Environmental Services ("DES") received an minimum impact expedited application to construct a 12' wide (travel width) crossing with 3:1 side slopes, approximately 50' long, and install a 36" culvert to provide access to a wood lot area of the property.
2. Received with the application were plans not drawn to scale, but which showed the proposed crossing adjacent to the southern side of the State of NH Rockingham Recreational Trail ("RRT"), and a stone box culvert which conveys a stream which flows beneath the trail and onto the applicant's property.
3. On March 21, 2005 DES sent the applicant an acknowledgement of administrative completeness letter, and stated that DES would act on the application within 30 days of the date of that letter.
4. On April 1, 2005 DES received a letter and attachments, including photos of the crossing area taken 3/27/2005, a USGS map, and USGS aerial photos taken in 1998, from the abutter to the immediate north side of the RRT, from the property of whom the stream flows, questioning the size of the proposed culvert, the impact of a road running across the wetlands and stream parallel and adjacent to the trail, and expressing concern should the new culvert become plugged.
5. On April 18, 2005 DES sent a letter to the applicant requesting submission of a full plan, drawn to an engineering scale, of the entire parcel which depicts the property boundaries; the access point for this driveway, and any other features, such as existing dwellings, out-buildings, etc., if this project represents a use of an existing, developed lot, and stating that without a scale it was not possible to determine if the project meets the requirement to be located at least 20' off the abutting NH Rockingham Recreational Trail property line. This letter further requested identification of the methodology by which the wetland boundaries were delineated.
6. On May 3, 2005 DES received the applicant's response to the request for more information.
7. Examination of the photos submitted by the abutter to the RRT shows that the proposed crossing area is inundated surface water area at the confluence of the stream and the pond which is far more extensive than that depicted by the applicant. The original plan submitted without a scale stated that the crossing was "approximately 50 feet long." Measurement of the crossing area on the plan entitled "Map of the Chivers Woodlands and Dead Pond Farm" by C. Moreno, LPF, dated 9/97, received by DES on May 3, 2005, with a scale of 1" = 400', indicates the crossing to be approximately 120' in length.
8. DES conducted a field inspection of the site on 5/17/2005.
9. Field inspection of the site finds that in order to achieve a 20' setback from the most conservative estimated property line of the RRT at the toe of the trail slope, the applicant would be well out into the inundated area of the pond with 30' of overall road base fill width.
10. No permission has been received by DES from the NH Bureau of Trails to allow the applicant to create wetland impacts within 20' of the RRT.
11. The applicant has failed to provide a current engineered or surveyed plan which provides verifiable depiction of the property boundaries, or depiction of wetland boundaries based on field delineation according to the requirements of Administrative Rules Wt 301.01 and Wt 501.02(a)(2)f.; or that clearly establishes the length, location, or potential impact of the proposed crossing, particularly with respect to the RRT property.
12. The project fails to meet the Administrative Rule criteria for minimum impact crossing projects, including Wt 303.04(e), as the crossing is not proposed to cross a forested wetland, cross during frozen conditions, or be retired in spring; or Wt 303.04(g), as the fill length exceeds 50 feet in length and crosses an open surface water area; or Wt 303.04(z), as the length of the crossing exceeds 60 feet in length, and crosses a surface water area in excess of 10 feet in width.
13. The project as proposed and presented does not adequately establish need as required by Rule Wt 302.04(a)(1), nor does it represent avoidance and minimization per Rule Wt 302.03, or the least impacting alternative per Rule Wt 302.04(a)(2).
14. The project as proposed and presented fails to demonstrate that there will be no impact to the abutting property owner (the RRT). Per RSA 482-A:11 II, no permit to dredge or fill shall be granted if it shall infringe on the property rights of an abutting property owner.
15. Per the requirements of Rule Wt 302.04(d), DES shall not grant a permit if there is a practicable alternative which would have less impact on the area and environments under the department's jurisdiction, or would cause the random or unnecessary destruction of wetlands.

Requested Action:

Utilize not more than 10 cu yd of sand to replenish and expand an existing beach to final dimensions of 22 ft x 14 ft on 1073 feet of frontage on Lake Wicwas, Meredith.

APPROVE PERMIT:

Utilize not more than 10 cu yd of sand to replenish and expand an existing beach to final dimensions of 22 ft x 14 ft on 1073 feet of frontage on Lake Wicwas, Meredith.

With Conditions:

1. All work shall be in accordance with plans received by the Department on May 9, 2005.
2. Any excavated material shall be placed outside of the DES Wetlands Bureau jurisdiction.
3. No more than 10 cu yd of sand may be used and all sand shall be located above the normal high water line.
4. This permit shall be used only once, and does not allow for annual beach replenishment.
5. The permittee shall provide appropriate diversion of surface water runoff to prevent erosion of beach area.
6. This permit does not authorize the removal of any trees from the beach area.
7. Appropriate siltation and erosion controls shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized.
8. All activity shall be in accordance with the Comprehensive Shoreland Protection Act, RSA 483-B (see attached fact sheet)

With Findings:

1. This project is classified as a minimum impact project per Rule Wt 303.04 (d), construction of a single family beach utilizing less than 50 ft of frontage.

2005-00568 MARTEL, PAUL & PAULA
BARRINGTON Unnamed Stream

Requested Action:

Dredge and fill 2,890 sq. ft. of wetlands associated with abutment construction of a 44 linear foot free span bridge over an unnamed perennial stream to access upland for construction of a commercial building.

Conservation Commission/Staff Comments:

Conservation Commission signed expedited application.

APPROVE PERMIT:

Dredge and fill 2,890 sq. ft. of wetlands associated with abutment construction of a 44 linear foot free span bridge over an unnamed perennial stream to access upland for construction of a commercial building.

With Conditions:

1. All work shall be in accordance with plans by Eckman Engineering LLC dated 12/15/2004, as received by the Department on 3/28/2005.
2. Dredged material shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
3. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.
4. Orange construction fencing shall be placed at the limits of construction to prevent accidental encroachment on wetlands.
5. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
6. Within three days of final grading or temporary suspension of work in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
7. Work shall be done during low flow.

With Findings:

1. This is a minimum impact project per Administrative Rule Wt 303.04(f), alteration of less than 3,000 sq. ft. of swamps or wet meadows.
2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.

**2005-00598 ENGELWOOD DEVELOPMENT II, LLC, CHRIS STUVART V.P.
HILLSBOROUGH Unnamed Wetland**

Requested Action:

Dredge and fill 2,892 square feet of palustrine forested wetlands to construct a common driveway to 2 lots of a proposed 5-Lot subdivision

Conservation Commission/Staff Comments:

The Conservation Commission did not sign the original expedited application.

Conservation Commission submitted a letter of approval on May 6, 2005.

APPROVE PERMIT:

Dredge and fill 2,892 square feet of palustrine forested wetlands to construct a common driveway to 2 lots of a proposed 5-Lot subdivision

With Conditions:

1. All work shall be in accordance with plans by Turner Group, sheets 1-3, and subdivision plan by Brown Engineering as received by the Department on April 1, 2005.
2. This permit is contingent on approval by the DES Subsurface Systems Bureau.
3. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.
4. The deed which accompanies the sales transaction for each of the lots in this subdivision shall contain condition #3 of this approval.
5. This permit shall not be effective until it has been recorded with the Registry of Deeds Office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau.
6. Work shall be done during low or non flow.
7. Appropriate siltation and erosion controls shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized.
8. Within three days of final grading or temporary suspension of work in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
9. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).

With Findings:

1. This is a minimum impact project per Administrative Rule Wt 303.04(f), alteration of less than 3,000 sq ft of nontidal jurisdictional wetlands.
2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.

4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.
5. The Conservation Commission did not sign the original expedited application.
6. The Conservation Commission submitted a letter of approval.

**2005-00939 BELMONT, TOWN OF
BELMONT Unnamed Wetland**

Requested Action:

Impact approximately 100 square feet of forested wetland to install a 20-foot treatment swale and 15-inch by 28-foot culvert beneath Linda Drive to reestablish the hydrological connection of the adjacent wetlands.

Conservation Commission/Staff Comments:

The Belmont Conservation Commission signed the Minimum Impact Expedited Application.

APPROVE PERMIT:

Impact approximately 100 square feet of forested wetland to install a 20-foot treatment swale and 15-inch by 28-foot culvert beneath Linda Drive to reestablish the hydrological connection of the adjacent wetlands.

With Conditions:

1. All work shall be in accordance with plans received by the Department on May 9, 2005.
2. Any further alteration of areas on this property that are within the jurisdiction of the DES Wetlands Bureau will require a new application and further permitting by the Bureau.
3. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.
4. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).
5. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
6. Work shall be done during low flow conditions.
7. Dredged material shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
8. Proper headwalls shall be constructed within seven days of culvert installation.
9. Within three days of final grading or temporary suspension of work in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.

With Findings:

1. This is a minimum impact project per Administrative Rule Wt 303.04(f), alteration of less than 3,000 square feet of jurisdictional forested wetland.
2. The need for the proposed impacts has been demonstrated by the applicant per Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.
